**A whole world of  
graphic software products**

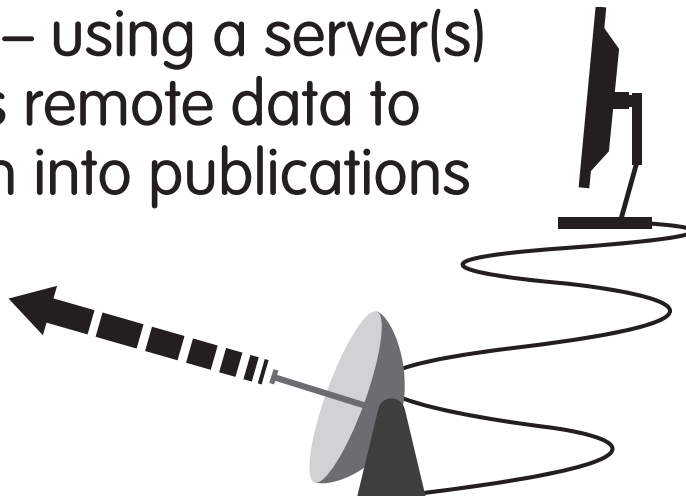

## Pagerunner saves time and expense

- Whatever your present systems are for design and artwork production.
- The future is pagerunner.

## Pagerunner operates either:

- **Locally** – on individual PCs within editorial or design/artwork arena
- **Globally** – using a server(s) to access remote data to transform into publications

# Pagerunner

- Pagerunner offers many solutions for data mapping from word templates into indesign templates
- Produces publications, booklets, marketing material in corporate style

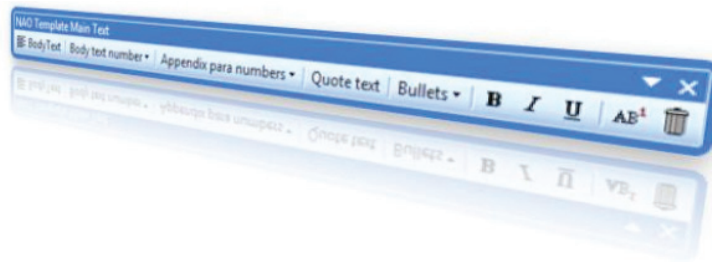

# e-learning module

- Will teach and remind users how to work with pagerunner – and is adaptable to individual needs

## Purpose

This online module will introduce you to the new Word template, which has been designed to assist in the production of documents that match our corporate report style.

You will discover how to use the NAO Template toolbars provided in this template to appropriately format a document.

## Individual graphics programmes

- Includes programmes to define styles and prepare data for print or web. These can be produced to clients specification/requirements

# Word Monkey

- This amazing software will “flatten” poorly produced word data and reinstate in the required word template for use in pagerunner or corporate web style
